4 UNITED STATES DISTRICT COURT
5 WESTERN DISTRICT OF WASHINGTON
6 AT SEATTLE

7 MICROSOFT CORPORATION, a
8 Washington Corporation,

9 Plaintiff,

10 v.

11 JOHN DOES 1-10 using IP address
12 73.28.34.136,

13 Defendants.

)
)
) CASE NO. C17-1587RSM
)
)

) ORDER GRANTING PLAINTIFF'S
) MOTION TO EXPEDITE DISCOVERY
)
)
)

14 I. INTRODUCTION

15 Plaintiff alleges copyright and trademark infringement claims against several unknown
16 John Doe Defendants that appear to be using IP address 73.28.34.136 to illegally activate
17 Plaintiff's software. Dkt. #1 at ¶¶ 37-52. It now seeks permission to take limited, expedited
18 discovery from Comcast IP Services, LLP ("Comcast"), an internet service provider ("ISP"), to
19 identify and name the John Doe Defendants in this case so that it can complete service of process
20 and proceed with litigation. Dkt. #4 at 5-7. As further discussed below, Plaintiff has
21 demonstrated that: (1) the John Doe Defendants are real people and/or entities that may be sued
22 in federal court; (2) it has unsuccessfully attempted to identify the John Doe Defendants prior to
23 filing this motion; (3) its claims against the John Doe Defendants would likely survive a motion
24 to dismiss; and (4) there is a reasonable likelihood that service of the proposed subpoena on
25 Comcast will lead to information identifying the John Doe Defendants. As a result, the Court
26 finds that good cause exists to allow Microsoft to engage in expedited, preliminary discovery.

ORDER
PAGE - 1

II. BACKGROUND¹

Plaintiff develops, distributes, and licenses various types of computer software, including operating system software (such as Microsoft Windows) and productivity software (such as Microsoft Office). Dkt. #1 at ¶¶ 8-16. Microsoft holds registered copyrights in the various different versions of these products, and has registered trademarks and service marks associated with the products. *Id.* at ¶ 16.

Microsoft has implemented a wide-range of initiatives to protect its customers and combat theft of its intellectual property, including its product activation system, which involves the activation of software through product keys. *Id.* at ¶ 24. A Microsoft product key is a 25-character alphanumeric string generated by Microsoft and provided either directly to Microsoft's customers or to Microsoft's original equipment manufacturer ("OEM") partners. *Id.* at ¶ 25. Generally, when customers or OEMs install Microsoft software on a device, they must enter the product key. *Id.* Then, as part of the activation process, customers and/or OEMs voluntarily contact Microsoft's activation servers over the Internet and transmit the product keys and other technical information about their device to the servers. *Id.* Because Microsoft software is capable of being installed on an unlimited number of devices, Microsoft uses the product activation process to detect piracy and protect consumers from the risk of non-genuine software. *Id.* at ¶ 26.

Microsoft has created the Microsoft Cybercrime Center where they utilize, *inter alia*, certain technology to detect software piracy, which it refers to as "cyberforensics." *Id.* at ¶ 29. Microsoft uses its cyberforensics to analyze product key activation data voluntarily provided by users when they activate Microsoft software, including the IP address from which a given product

¹ The following background is taken from Plaintiff's Complaint and the Declaration of Brittany Carmichael filed in support of Plaintiff's Motion for Expedited Discovery. Dkts. #1 and #5.

1 key is activated. Dkt. #1 at ¶ 30. Cyberforensics allows Microsoft to analyze the activations of
2 Microsoft software and identify activation patterns and characteristics that make it more likely
3 than not that the IP address associated with certain product key activations is one through which
4 unauthorized copies of Microsoft software are being activated. Dkt. #5 at ¶¶ 2-5. Microsoft's
5 cyberforensics have identified a number of product key activations originating from IP address
6 73.28.34.136. *Id.* at ¶ 6. According to publicly available data, that IP address is presently under
7 the control of Comcast. *Id.*

9 Microsoft alleges that for at least the past three years, the aforementioned IP address has
10 been used to activate thousands of Microsoft product keys. *Id.* at ¶ 7. These activations have
11 characteristics that demonstrate that the John Doe Defendants are using the IP address to activate
12 unauthorized copies of Microsoft's software. *Id.* Microsoft believes these activations constitute
13 the unauthorized copying, distribution, and use of Microsoft software, in violation of Microsoft's
14 software licenses and intellectual property rights. *Id.* at ¶ 8. Despite its best efforts, Microsoft
15 has been unable to positively identify the John Doe Defendants. *Id.* at ¶ 9. Microsoft believes
16 Comcast has access to the subscriber information associated with the subject IP address from
17 records kept in the regular course of its business. *Id.* at ¶ 11.

20 III. DISCUSSION

21 A. Legal Standard

22 This Court may authorize early discovery before the Rule 26(f) conference for the parties'
23 and witnesses' convenience and in the interests of justice. Fed. R. Civ. P. 26(d). Courts within
24 the Ninth Circuit generally consider whether a plaintiff has shown "good cause" for such early
25 discovery. *See, e.g., Yokohama Tire Corp. v. Dealers Tire Supply, Inc.*, 202 F.R.D. 612, 613-14
26 (D. Ariz. 2001) (collecting cases and standards). When the identities of defendants are not known
27 before a Complaint is filed, a plaintiff "should be given an opportunity through discovery to
28

1 identify the unknown defendants, unless it is clear that discovery would not uncover the
2 identities, or that the complaint would be dismissed on other grounds.” *Gillespie v. Civiletti*, 629
3 F.2d 637, 642 (9th Cir. 1980). In evaluating whether a plaintiff establishes good cause to learn
4 the identity of John Doe defendants through early discovery, courts examine whether the plaintiff
5 (1) identifies the John Doe defendant with sufficient specificity that the Court can determine that
6 the defendant is a real person who can be sued in federal court, (2) recounts the steps taken to
7 locate and identify the defendant, (3) demonstrates that the action can withstand a motion to
8 dismiss, and (4) proves that the discovery is likely to lead to identifying information that will
9 permit service of process. *Columbia Ins. Co. v. seescandy.com*, 185 F.R.D. 573, 578-80 (N.D.
10 Cal. 1999).

11 12 13 **B. Plaintiff Has Shown Good Cause to Take Early Discovery**

14 Here, Plaintiff has established good cause to engage in early discovery to identify the
15 John Doe Defendants. First, Plaintiff has associated the John Doe Defendants with specific acts
16 of activating unauthorized software using product keys that are known to have been stolen from
17 Microsoft, and have been used more times than are authorized for the particular software. Dkt.
18 #5 at ¶¶ 6-8. Plaintiff has been able to trace the product key activations as originating from one
19 IP address, and nearly all of the activations have involved voluntary communication between the
20 John Doe Defendants and Microsoft activation servers in this judicial District. *Id.* at ¶ 7. Second,
21 Plaintiff has adequately described the steps it took in an effort to locate and identify the John Doe
22 Defendants. Dkt. #5. Specifically, it utilized its “cyberforensics” technology to analyze product
23 key activation data and identified certain patterns and characteristics which indicate software
24 piracy. Dkt. #5 at ¶¶ 2-4 and Dkt. #1 at ¶¶ 29-32. Third, Plaintiff has pleaded the essential
25 elements to state a claim for Copyright Infringement under 17 U.S.C. § 501, *et seq.*, and
26 Trademark Infringement under 15 U.S.C. § 1114. Dkt. #1 at ¶¶ 37-52 and Exs. 1-37. Fourth,
27
28

1 the information proposed to be sought through a Rule 45 subpoena appears likely to lead to
2 identifying information that will allow Plaintiff to effect service of process on the John Doe
3 Defendants. Dkt. #5 at ¶¶ 10-12. Specifically, Plaintiff states it will seek subscriber information
4 associated with the alleged infringing IP address. Dkt. #5 at ¶ 12.

5
6 Taken together, the Court finds that the foregoing factors demonstrate good cause to grant
7 Plaintiff's motion for leave to conduct limited expedited discovery. *See Semitool*, 208 F.R.D. at
8 276. Therefore, the Court will grant discovery limited to documents and/or information that will
9 allow Plaintiff to determine the identities of the John Doe Defendants in order to effect service
10 of process.

11 IV. CONCLUSION

12
13 For the reasons set forth above, the Court hereby ORDERS:

- 14 1. Plaintiff may immediately serve on Comcast IP Services, LLP (or its associated
15 downstream ISPs) a Rule 45 subpoena to obtain documents and/or information to
16 identify John Does 1-10.
17
18 2. At this time, any documents requests shall be limited to documents sufficient to
19 identify all names, physical addresses, PO boxes, electronic addresses (including
20 email addresses), telephone numbers, or other customer identifying information that
21 are or have been associated with the IP address 73.28.34.136.
22

23
24 DATED this 1 day of November, 2017.
